Casey,

I take it you don't have any more information? We (or at least I) don't have the ability to run any sort of facial recognition against the database of sex offenders. You could theoretically search through CalPhoto manually, but that would take an enormous amount of time. From these pictures, I can't discern if the subject is a 290. I apologize I can't be of more help.

Subject: Target Male Photos

Detective Grogan,

Here are the best face shots I was able to obtain on the subject. If you need anything else let me know. Thank you!
